## **DETAILED ACTION**

### ***Information Disclosure Statement***

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered. The examiner has not considered the listed references at this time (see page 5). If applicant desires to have these references considered by the examiner, they must be cited on a PTO-892.

### ***Drawings***

This application has been filed with informal drawings, which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 25-32 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims positively recite "A therapeutic product obtained from cord blood or placental blood, said product comprising white blood cells..." in independent claim 25. A claim or claims directed to or including within its scope a human being or a part of a human being is not patentable subject matter under 35 U.S.C 101. The grant of a

patent giving limited, but exclusive property right to a human being is prohibited by the Constitution. Therefore, it is suggested that any claim that would include a human being, or part thereof, within its scope should use a negative limitation to define the metes and bounds of the claimed subject matter which is a permissible form of expression.

### **Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rubinstein et al. (5,928,214 ; 5,789,147), Kass et al. (5397479), Boyse et al. (5,192,553; 5,004,681) and Lionetti et al. (4,004,975) all disclose methods of separating therapeutic product for storage and containers for storing said therapeutic product. As best can be understood, the above-cited documents are analogous to the disclosed invention.
